## Business Announcement

### Local doctor receives specialized wellness certification

Orleans, Ontario – Dr. Nathalie Beauchamp of Orleans, owner of Beauchamp Chiropractic recently attended specialized training at the world headquarters for Creating Wellness™ in New Jersey. The highly specialized training focuses on revolutionary technology that assesses an individual's state of wellness in the 3 dimensions of health: physical, biochemical and emotional. Dr. Beauchamp learned the latest breakthrough in wellness science and how to perform the most advanced wellness assessment ever developed.

This breakthrough technology scientifically measures, records, and scores your level of wellness in all three dimensions. One of the unique features of the Creating Wellness™ system is the "Wellness Quotient". The Wellness Quotient is a score of your overall state of wellness – think of it as a Wellness IQ. It helps the doctor determine your biological age and if you are aging prematurely. Then, based on your scores, a specific customized wellness program shows you how to scientifically slow, stop, and reverse the aging process. The customized wellness program includes everything a patient needs to create wellness in their life.
